Consult your veterinarian for diagnosis and treatment.

 **Adequan i.m.®**  
polysulfated glycosaminoglycan

# Treat arthritis, not just its symptoms

Adequan® i.m. (polysulfated glycosaminoglycan) is unlike any other equine joint product. For over 30 years, it's been used by veterinarians to help horses of every discipline and level enjoy greater mobility over their lifetimes.<sup>1-3</sup>

Adequan i.m. has been proven to work in **multiple ways** to maintain joint function:<sup>1,4</sup>

REDUCE

inflammation

RESTORE

synovial joint lubrication

REPAIR

joint cartilage

REVERSE

the disease process

## Ask your veterinarian if Adequan® i.m. is right for your horse.

### INDICATIONS

Adequan® i.m. is recommended for the intramuscular treatment of non-infectious degenerative and/or traumatic joint dysfunction and associated lameness of the carpal and hock joints in horses.

### IMPORTANT SAFETY INFORMATION

There are no known contraindications to the use of intramuscular Polysulfated Glycosaminoglycan (PSGAG). Studies have not been conducted to establish safety in breeding horses. **WARNING:** Do not use in horses intended for human consumption. Not for use in humans. Keep this and all medications out of the reach of children. **CAUTION:** Federal law restricts this drug to use by or on the order of a licensed veterinarian.
